TO WHOM IT MAY CONCERN

We contracted Waikato Shed Company to design, supply and construct a 12m x 10m x 4.5m building at one of our industrial sites in Hamilton.

The project involved connecting into two existing buildings with one having an internal gutter that had to be extended.

They successfully completed the project using quality materials and with a high standard of workmanship and professionalism, and within the time specified.

We are happy to recommend Waikato Shed Company to anyone considering using their services.

Yours faithfully
Double R Limited
