TO WHOM IT MAY CONCERN

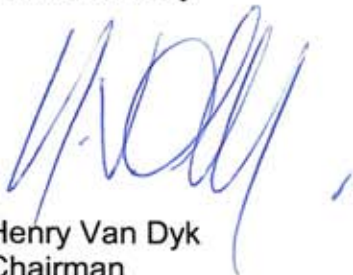

Waikato Shed Company was contracted to design, supply and construct a new 12m x 24m x 3.6m clearspan shed to be used as a workshop & storage facility at Rangiura Rest Home and Retirement complex in Putaruru, in September/October 2009.

The newly constructed shed has variable bay spacings with a 2metre span canopy over the three centre bays to shelter the three roller door openings beneath.

Right from the concept stage through to the construction stage, and final completion; we found the team at Waikato Sheds to be extremely professional and helpful. The shed was built to a high standard using quality materials and workmanship- Most importantly it was constructed to our exact specifications and in a suitable timeframe.

We have no hesitation in recommending Waikato Shed Company to anyone requiring a new shed, and would be happy to endorse this reference further. Please contact the undersigned if you require further information regarding Waikato Shed Company.

Yours faithfully

Henry Van Dyk
Chairman
RANGIURA TRUST BOARD
